CUBIC OUTDOOR LIVING

Welcome to CUBIC OUTDOOR LIVING and our custom made outdoor furniture. We manufacture furniture that adds comfort and luxury to your outdoor living space.

The combination of the highest quality materials and distinctive design makes our outdoor furniture unique. Each piece of furniture is handmade in our manufactory and meets the highest quality standards.

The unique construction method guarantees the durability of the outdoor furniture pieces and the dry storage of your garden utensils, no matter what the weather conditions are. Each piece of furniture is unique and is adapted to the conditions on site - there are no limits to your individual ideas.

When designing your outdoor area, the CUBIC OUTDOOR LIVING team are always at your side with knowledge and expertise.

Let our collections inspire you!

CUBIC OUTDOOR KITCHEN

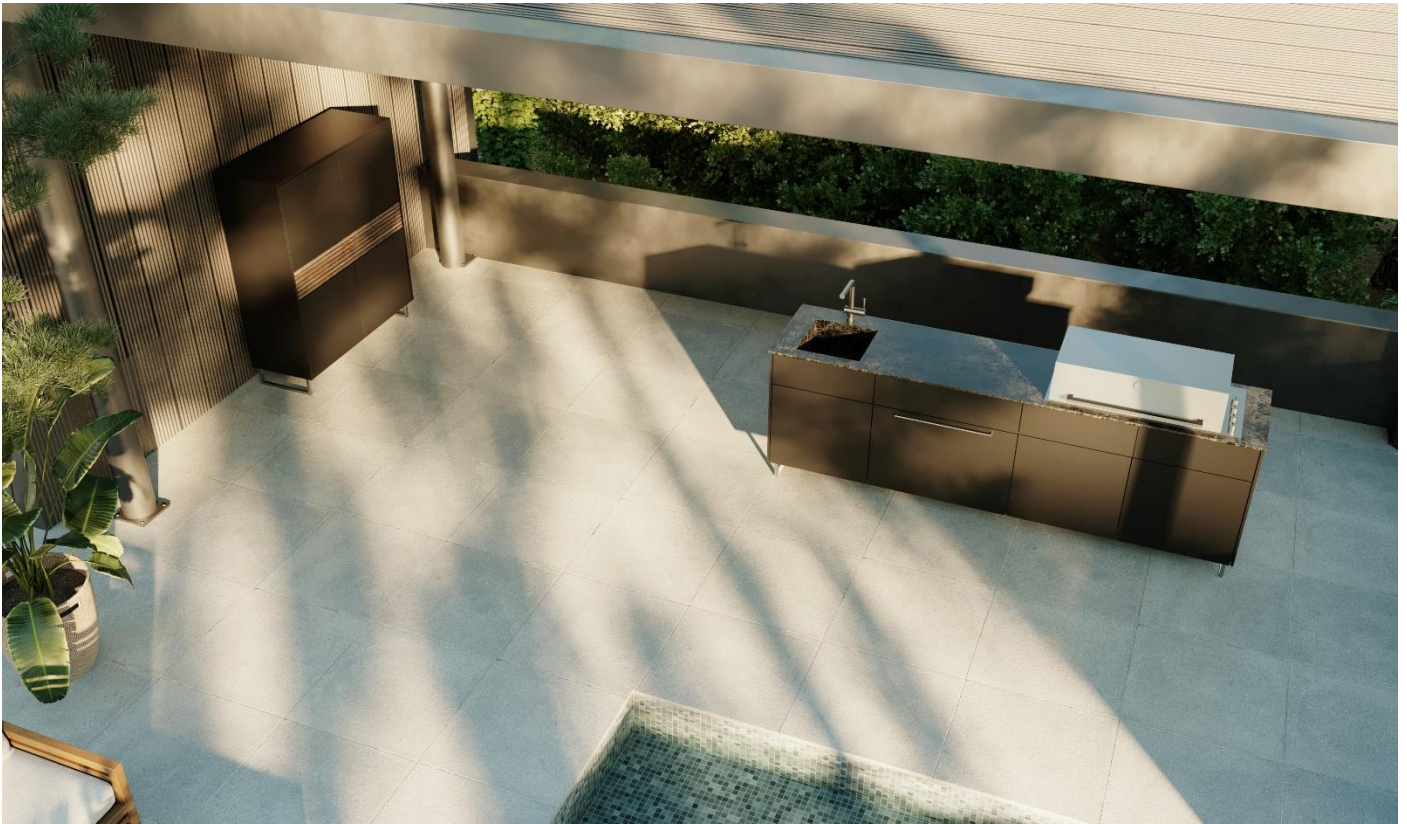

Summer, sun, outdoor kitchen! Together with family and friends, the open-air cooking area will soon become your new favourite place.

The production of the weatherproof CUBIC OUTDOOR KITCHEN takes place in the heart of Germany in our purpose built facility, and individuality is particularly important here. Thanks to the handmade production methods, we are able to respond to wishes that are not standard. At the same time, all materials are optimally designed for outdoor use.

During the production process, we use a modular system of the CUBIC OUTDOOR KITCHEN which streamlines the manufacturing and planning process. The design and arrangement of the modules can be freely combined. There are no limits to your ideas.

Together with you we find the optimal solution!

COOKING UNDER THE OPEN SKY

CUSTOM MADE

Due to the order-related production and a modular construction concept, the CUBIC OUTDOOR KITCHEN is tailored to extraordinary wishes. There are no limits to your individual ideas and imaginations.

The body of the kitchen is made of our robust, weather-resistant CUBIC material and is painted in the colour of your choice. For a more natural look, the kitchen can be covered with wooden slats. In this case, there are various woods to choose from that are especially suitable for outdoor use.

Let us inspire you and customize your CUBIC OUTDOOR KITCHEN. We will be happy to help you with every step of the planning process - from the optimal placement to the selection of the perfectly matching worktop.

C3 STYLE

Open space planning, clear architectural axes: this outdoor kitchen embodies the fusion of outdoor cooking and outdoor living into a holistically conceived living space.

The front and back walls of the CUBIC OUTDOOR KITCHEN C3 are faced with the same ceramics as the worktops and waterfall ends. This creates a unique style that has never been seen before in the outdoor sector.

The CUBIC OUTDOOR KITCHEN C3 offers completely new possibilities, especially for lovers of light colours. Thanks to the high quality ceramic veneer, even white shades look harmonious and natural. In this way, ceramic creates an exquisite and timeless look in the outdoor area, which is also maintained in the long term.

From the beginning, the natural wood cladding has been the distinguishing feature of a CUBIC outdoor kitchen, wooden elements can also be charmingly added to the C3 model to create an appearance that when combined with the ceramics emphasises the natural materials in the surrounding of the garden.

SUPREME QUALITY

Only the best is good enough for us and our customers. We only use materials of the highest quality such as stainless steel or ceramic. Our outdoor kitchens can therefore be used all year round outdoors without roofing and without restrictions.

We also rely exclusively on high-quality brand-name products for the built-in appliances, from grills and hobs to refrigerators and sinks. All the worktops we use, whether made of ceramic or natural stone, have proven themselves outdoors.

What else makes our CUBIC OUTDOOR KITCHEN so unique?

Storage space! Dry and tight all year round, whether as a drawer or cupboard - so your cooking utensils stay just as clean in your outdoor kitchen as they do in your indoor kitchen.

365 days

Outdoors like indoors. 365 days a year. Rain, storm, snow, salt, sand or sun.

The CUBIC OUTDOOR KITCHEN withstands any weather. Through decades of experience and further development, our products are optimally designed for durability and resilience.

As a result, the CUBIC OUTDOOR KITCHEN and the built-in cooking units do not require any roofing and all your kitchen utensils are stored safely and dryly in drawers and storage spaces.

Thanks to our experience, we can guarantee the durability and weather resistance of all our outdoor furniture and the materials used.

IF YOU NEED HEAT

What built-in appliances should your outdoor kitchen be equipped with?

The options here range from gas grills, side burners, planchas, induction hobs and ceramic grills to sinks and refrigerators. The dimensions of your kitchen appliances will determine the rest of the outdoor kitchen's dimensions.

Grills should be placed as far away from the seating area as possible to keep distracting smoke and odours away from guests. Leave enough space on both sides of the grill to place plates and grill utensils. If you have not yet chosen a particular piece of equipment, we will be happy to suggest a suitable selection. Simply provide us with detailed information about what is particularly important to you in the corresponding type of equipment.

CREATE YOUR DREAM KITCHEN

1. Location

In the garden, on the roof terrace or the outdoor seating area - there are many possibilities where a CUBIC OUTDOOR KITCHEN can find its place. Is the kitchen accessible from all sides or does it stand against the wall?

2. Collection

Spoilt for choice: opt for the flexible CUBIC OUTDOOR KITCHEN C1 or the elegant and more puristic CUBIC OUT-DOOR KITCHEN C2.

3. Connections

Water, electricity and gas are the most important elements of a functioning outdoor kitchen. Hot water can be provided by a an electric water boiler. Electrical outlets should also be included.

4. Built-in appliances & storage space

Whether it's a sink, cooktop, sink drawer, gas grill, or induction cooktop - which built-in appliances should your kitchen be equipped with? You will also need additional storage space for cutlery and dishes.

5. Seating area

If there is enough space in your garden or on your terrace, you can additionally plan a seating area with bar stools at the outdoor kitchen for a nice summer evening

6. Colour & wood

Choose the exact shade that perfectly matches your kitchen and the surroundings. Wood panelling adds a visual highlight.

7. Worktop

You have the choice between a ceramic or natural stone worktop. With the thickness of the worktop, you can play between a light or a solid look

COLOURS

The fronts and cabinets of CUBIC outdoor furniture are made of our complete and continuous weatherproof material.

The exterior surface can be either completely smooth, with a sanding pattern or with a special textured finish similar to a powder coating.

The body of your CUBIC furniture will be painted to blend in perfectly with the existing environment.

You can choose from our ten standard colours or pick a custom shade. We will be happy to provide you with original samples.

WOOD

For a particularly natural charm, you can cover your furniture with stylish wooden slats. These can be arranged both vertically and horizontally and can be attached to the back wall, side wall or front as required. We only use only the highest quality woods, which are characterized by their durability in outdoor use. Depending on the type of wood, changes will occur, but they do not affect the stability and durability of the wood. This process is a natural part of the aging process. Special woods and coatings are available upon request. We will be happy to provide you with original samples.

WORKTOPS

With a high-quality worktop, your CUBIC OUTDOOR KITCHEN becomes a real workplace. Basically, you have the choice between a ceramic or natural stone worktop. With their light weight, our ceramic worktops are particularly suitable for roof terraces. When handled properly, the fired surface is extremely scratch-resistant, acid-resistant and easy to clean. Ceramic also does not absorb odours, does not release substances and certainly does not provide a breeding ground for bacteria, germs or mould. Thanks to its insensitivity to acids or dirt, the ceramic worktop will remain beautiful for years to come. With

natural stone, the kitchen can be perfectly matched to the flooring or achieve a natural look. With the thickness of the worktop, you can play between light and solid look. Special decors and natural stone are available on request. We will be happy to provide you with original samples.
